A Word From the Owner

We take pride in everything we do. From our customers' initial contact with us, to the final installation. Being active in the business on a daily basis, it is my responsibility to ensure that all of our customers' needs are looked after. Thirty years in business has taught me that looking after our customer needs first and the business needs second, is the model that leads to long term success.

I truly appreciate your business.

Our Process

1. Initial Consultation

Schedule a complimentary In-Home or Gallery Showroom consultation. During this initial consultation, we will help determine your needs, expectations, and budget while designing practical and beautiful window coverings for your home or office.

Some of the factors we consider while recommending products are light control, privacy, safety, energy efficiency, and UV protection, your personal design preferences, and whether automation & motorization can or should be incorporated.

2. Explore Your Options

See the colours, fabrics, operating control lifting systems, and styles offered by Hunter Douglas. We will show you every option available and recommend the best products and systems for your space.

Open every shutter, operate every blind, talk to a specialist, or feel free to browse the displays and sample books.

3. Finalizing Measurements

Once you are ready to proceed with your selections, we work with you as our customer to make any final considerations to ensure your order is perfect for your space.

4. Your Order is Placed!

After we receive a deposit, your order is placed. When the supplier has given us the expected shipping date, we will be in contact with you to arrange your installation and any other final arrangements. We do our best to have a quick turnaround in this process.
